#### Facts about CPR

1. Sudden cardiac arrest is the leading cause of death in adults. Most arrests occur in persons with underlying heart disease.
2. CPR doubles a person's chance of survival from sudden cardiac arrest.
3. 75% of all cardiac arrests happen in people's homes.
4. The typical victim of cardiac arrest is a man in his early 60's and a woman in her late 60's.
5. Cardiac arrest occurs twice as frequently in men compared to women.
6. CPR was invented in 1960
7. There has never been a case of HIV transmitted by mouth-to-mouth CPR.
8. In sudden cardiac arrest the heart goes from a normal heartbeat to a quivering rhythm called ventricular fibrillation (VF). This happens in approximately 2/3rds of all cardiac arrests. VF is fatal unless an electric shock, called defibrillation, can be given. CPR does not stop VF but CPR extends the window of time in which defibrillation can be effective.
9. CPR provides a trickle of oxygenated blood to the brain and heart and keeps these organs alive until defibrillation can shock the heart into a normal rhythm.
10. If CPR is started within 4 minutes of collapse and defibrillation provided within 10 minutes a person has a 40% chance of survival.

Immanuel Lutheran Church, Tuscola, IL, will be hosting its second annual Drive-Through Live Nativity on Sunday, December 4, 4:30-6:30 PM. There will be live animals, a choir of Christmas carolers, and a beautiful set for Bethlehem. We hope to see you there.

After church today we will have a special offering for new playground equipment.
